Our school this year just started a one-to-one Ipad initiative and the move has made my students so much more in line to learning the necessary skills of streamlining the tasks they need to complete as well as deal with the issues all 21st century high school/college graduates will face in terms of how to prioritize their time, deal with distractions, and increase productivity in using technology to achieve their goals. Please increase funding to the E-rate program to provide other students across the state and nation adequate access to high speed broadband.
